HIGH PERFORMANCE JENN-AIR DISHWASHERS OFFER FLUSH INSTALLATION AND BUILT-IN WATER SOFTENER

BENTON HARBOR, Mich. (September 8, 2014) – Designed to align perfectly with a range of cabinets, including frameless styles, the latest Jenn-Air dishwashers offer powerful yet quiet performance with a host of thoughtful features, including a built-in water softener.

“Our newest luxury dishwashers were made to fit seamlessly within adjacent cabinetry, even frameless European-style cabinets with depths as shallow as 24 inches,” notes Jenn-Air brand experience manager Juliet Johnson. “In addition to beautifully blending into their surroundings, these latest models are nearly silent when running and have the flexibility to handle cleaning everything from wine glasses and utensils to tall vases and large serving platters.”

A new built-in water softener enhances cleaning performance by reducing spots and water marks on dishes and glasses. The softened water also offers the additional benefit of protecting the dishwasher from limescale. To further improve cleaning results, the new models include a Detergent Tab Tray that uses a dedicated jet spray to help thoroughly dissolve and disperse detergent. An Extra-Tall-Item Sprinkler Head cleans extra tall items like serving platters, cookie sheets, hood filters and refrigerator shelves.

For added convenience, a removable third level rack holds difficult-to-place items, from spatulas and whisks to ladles. Ball bearings are precision mounted in each of the upper rack’s UltraGlide rails for easy and smooth operation. Stylish rack handles with stainless steel accents are designed for easy grasping.

To avoid unintentional interruption of cycles during use, a cycle status light casts an informational LED light beam on kitchen floor to indicate that the nearly-silent dishwasher is still running.

At the heart of the new dishwashers is the brand’s Trifecta™ Wash System, which combines alternating wash action, three stage filtration, a variable speed motor and pressurized wash arms for powerful, quiet and energy efficient washing. The versatile Sensor Wash cycle calibrates the dishwasher to use the optimal wash cycle to clean dishes based on load size and soil level.

All models are ENERGY STAR® qualified with loading capacity for 13 place settings and feature WaterLock™ Plus Flood Protection Technology. Style choices include a custom overlay option or stainless steel with a Pro-Style® handle featuring a diamond-etched grip or the slightly curved Euro-Style handle design.

About Jenn-Air:

Since the introduction of the first self-ventilated cooktop in 1961 and downdraft ventilated range in 1965, Jenn-Air brand has consistently grown its reputation as a technology and design innovator. Over the next three years, Jenn-Air will continue to expand its offerings with the launch of an unprecedented 150 new products. Its selection of style options includes two distinct stainless steel collections and a cutting-edge Floating Glass finish in black or white. From downdraft cooktops, wall ovens and professional style ranges to dishwashers, refrigerators and such entertaining essentials as warming drawers, built-in ice machines and wine cellars, Jenn-Air brand offers a complete line of major kitchen appliances.
