## **JENN-AIR INTRODUCES BUILT-IN COFFEE SYSTEM**

BENTON HARBOR, Mich. (March 20, 2014) – Recognizing that any high-end kitchen is incomplete without the means to prepare a proper cup of coffee or espresso, luxury appliance innovator Jenn-Air has introduced a 24” built-in coffee system that combines elegant, seamless design with all the bells and whistles needed to easily create barista-quality coffee at home.

This latest addition to the full collection of luxury Jenn-Air appliances offers coffee aficionados a wide range of custom brewing options for crafting the perfect cup, down to the strength of the brew and the foam on top. The system incorporates 13 different, integrated levels for grinding whole beans, a frothing system, customizable water temperature and dedicated milk buttons that can be used to recreate favorite coffeehouse concoctions from café lattes to cappuccinos. While designed for making professional-quality fresh-ground coffee and robust espressos, its intuitive interface, user-friendly controls and easy-to-use features allow for an uncomplicated, effortless process.

Additional features include automatic grinding, brewing and frothing, and the ability to brew two cups at the same time. For easy maintenance, a removable brewing unit and a one-button cleaning control for the frothing system complete the cleaning process in just minutes.

“Premium coffee and coffee-based beverages put the finishing touch on any event, from a casual weekend brunch to an elegant multi-course dinner party,” notes Jenn-Air brand manager, Juliet Johnson. “As a brand that aims to provide the best and most beautifully designed products for cooking and entertaining, a built-in coffee system is a welcome addition to our collection of more than 50 new SKUs launching this year.”

Available in Euro-Style stainless and with a width of 24 inches, the coffee system’s sleek, built-in design can be easily incorporated into an array of kitchen and cabinetry designs.

“With the introduction of this product into the category, users are able to shift their focus from past systems that required a complex maintenance process and focus on what matters most: a perfectly crafted cup of coffee,” adds Johnson.

About Jenn-Air:

Since the introduction of the first self-ventilated cooktop in 1961 and downdraft ventilated range in 1965, Jenn-Air brand has consistently grown its reputation as a technology and design innovator. Its selection of style options includes two distinct stainless steel collections and a cutting-edge Floating Glass finish in black or white. From downdraft cooktops, wall ovens and professional style ranges to dishwashers, refrigerators and such entertaining essentials as warming drawers, built-in ice machines and wine cellars, Jenn-Air brand offers a complete line of major kitchen appliances.
