A Legacy of Luxury

Jenn-Air brand is known for luxury kitchen appliances that offer sophisticated design, innovative technology and exceptional performance.

First recognized for creating the legendary downdraft cooktop and bringing convection cooking into the home, Jenn-Air brand makes exceptional appliances for the entire kitchen – from powerful, professional-style ranges to stylish, built-in refrigerators.

This legacy of luxury and uncompromising innovation is reflected in our precision-crafted products, like the revolutionary Accolade™ downdraft ventilation system. Select Jenn-Air® wall ovens feature the intuitive Culinary Center, which helps you achieve professional results, while our newest wall oven, the built-in steam & convection wall oven, can be installed anywhere and provides endless culinary possibilities. And the Jenn-Air® built-in coffee system allows for at-home brewing of fresh-ground coffee and robust espressos with ease. When it comes to cleaning, our powerful TriFecta® dishwashers clean as good as they look.

Our appliances offer you unprecedented performance as you cook and entertain. Because details matter to you, Jenn-Air brand will never settle for the ordinary when the extraordinary can be achieved.

Appliances in the Jenn-Air® Euro-Style Stainless kitchen suite combine modern aesthetics and classic flair. Crafted with simple, graceful lines, this extensive collection captures the sophistication of stainless steel. The elegant, uninterrupted design is just one part of the story. You’ll also enjoy exceptional performance that stirs your senses – and your creativity.

Design highlights of the Euro-Style suite include slightly curved, stainless steel handles and subtle, embossed lettering.

**Contemporary Classic**

Jenn-Air® appliances featured in the Floating Glass series bring pristine surfaces and elegant electronic controls together for a flawless look that will satisfy the most discriminating tastes.

The signature elements include high-gloss glass panels, which accent surrounding cabinetry and provide a clean, contemporary alternative to stainless steel. Other design highlights include a subtle badge with embossed metallic lettering and slightly curved, color-coordinated handles.

Enjoy cafe-style coffee – with or without a shot or two of espresso – in the convenience of your home. Brew robust coffees, incredible cappuccinos or rich lattes on demand, suited to your personal taste. The Jenn-Air™ built-in coffee system does it all. This system stores your coffee beans, grinding the perfect amount for immediate brewing and enjoyment – at peak, full-bodied flavor. And unlike other built-in systems, ours is designed for effortless cleaning so you won’t think twice about brewing another cup.
Coffee | The Perfect Brew

Two boilers maintain ideal temperature in the optimal brewing range to prevent scorching of fine espressos and coffees. The built-in coffee system’s 11.7 BARs of consistent brewing pressure enable excellent flavor extraction, while the dual-dispensing spouts allow for either one- or two-cup brewing.

Start with the Perfect Grind

The grinder's professional-style, metal construction helps ensure reliability, optimal grinding performance and exceptional flavor, no matter the coffeehouse-style beverage. The integrated whole-bean, conical coffee grinder has 13 settings, calibrated from fine to coarse for perfect brewing results.

One-Touch Cappuccinos

One-touch brewing of either one or two coffees, milk-based espresso drinks and even hot water dispensing serves up a wide variety of beverages, as though you had your own barista. The frothing system’s integrated milk container adjusts to create the perfect mix of foam and beverage.

Ease-of-Cleaning in Every Detail

Relax and enjoy your coffee. You won’t find a built-in coffee system that’s easier to clean. The frothing system has one-button steam cleaning, the brewing unit is easily removed and coffee grounds are compressed into small pucks for convenient disposal. You’ll appreciate the difference details make.
24” Built-In Coffee System

**JBC7624BS – 24”**

**Style Option:**

- Ideal 11.7 BARs of consistent brewing pressure
- Integrated 13-level whole-bean coffee grinder

**IMPORTANT:** Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions packaged with product before selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.
Unleash your culinary creativity. Jenn-Air® cooking appliances include our unparalleled wall ovens featuring the V2™ vertical dual-fan convection system, a steam and convection wall oven that lets you achieve incredible results, and the breathtaking Accolade™ downdraft ventilation system with an elegantly curved design. Experience the exceptional precision of our cooktops and ranges with customizable modular cooking surfaces and our highly effective JX3™ downdraft cooktops. Plus, our versatile warming drawers and stylish microwave ovens with extensive cooking modes will heighten your cooking flexibility.
Wall Ovens | Unparalleled Performance

Your kitchen transformation begins with ground-breaking wall ovens that feature incomparable performance. Single, double and combination ovens are available in 30- or 27-inch widths with one of three cooking systems – the V2™ vertical dual-fan convection system, 2-speed MultiMode® convection system or conventional thermal system.

2 Dual-Speed Fans, Custom Settings Yield Great Results

Jenn-Air® wall ovens with the V2™ vertical dual-fan convection system provide unbeatable performance with innovative cooking features and technology that combine to help you achieve consistently ideal results. The Jenn-Air® Culinary Center allows you to customize each cooking cycle – simply choose your preferences for a few settings, such as your preferred doneness level, and the oven automatically adjusts to create your desired end result. It all comes to life on an exclusive 7-inch full color touch-anywhere display.

MultiMode® Convection Brings Confidence to Baking and Roasting

All of our wall ovens represent a legacy of inspiration, and models with 2-speed MultiMode® convection are no exception. Outstanding performance features range from six convection modes that provide even baking and roasting on multiple racks to Auto Convection Conversion which gives you the confidence to cook with convection. A 4.3-inch full color menu-driven LCD display guides you effortlessly through the oven’s modes and functions.

Thermal Wall Ovens Offer “My Creations” for Favorite Recipes

Find everything you need in thermal ovens that offer excellent results for baking, broiling and roasting. Each oven’s 4.3-inch full color menu-driven LCD display features controls that highlight or dim depending on the relevant selections, making it easy to navigate through modes and functions. And you can use My Creations to save settings for your favorite recipes by combining up to three cooking modes for recipes with preset names.
30” Double Wall Oven with V2™ Vertical Dual-Fan Convection System
JJW3830W – 30”

My Creations
Featured on Jenn-Air® wall ovens, My Creations allows you to seamlessly combine up to three cooking modes and save the settings for your favorite recipes.
Complement Your Wall Oven with a Warming Drawer

Adding a warming drawer to your kitchen will help you create a comprehensive cooking center. Keep completed dishes warm and at the ideal texture until you’re ready to serve, or use its specialized slow roasting and bread proofing functions for even more flexibility. Match your warming drawer to any of our signature kitchen suite designs with a coordinating panel kit. See pages 110-115 for more details.

Common Cutout

Our double and single wall ovens fit into the existing cutout for nearly every competitor’s wall oven. Each oven fits into the smallest cutout, while its overall height also allows you to cover the remaining gap in the tallest cutout.

* Based on current competitor cutouts for double and single wall ovens.

Extraordinary Results for Exceptional Entertaining

Achieve culinary results you never thought possible. With steam and convection cooking at your fingertips, you can prepare virtually every type of food with flavors, appearances and textures that are nothing short of extraordinary. And because steam cooking enhances the nutrient retention in foods like vegetables and seafood, your meals will not only be distinctively flavorful, they’ll also be exceptionally healthy. Once you experience this remarkable oven, you’ll never entertain without it.

68 Ways to Create a Gourmet Dinner

Confidently create meals of distinction without the guesswork. Simply select the type of food you want to cook by using Preset Foods mode, and the oven provides all the cooking settings for you. You can further adjust these settings to suit your preference. With 68 different preset foods, virtually any kind of meal can be cooked to perfection.

Enhancing Flavors Gently and Powerfully

Your entertaining style calls for enticing aromas, exceptional flavors and food that’s as visually attractive as it is delicious. When you cook with steam and convection, your food’s flavors, nutrients and textures are preserved – letting you serve tender meats and poultry, colorful vegetables and restaurant-style breads.

Incredible Versatility, Endless Possibilities

Steam, convection heat, or a combination of the two let you cook almost every type of food imaginable. Prepare meats and poultry, seafood, vegetables, breads, side dishes such as potatoes, pastas, rice, desserts like fruit compotes, crème brulée, apple pies, and much more. Your culinary possibilities are endless.

---

### STEAM AND CONVECTION WALL OVEN

---

**Multi-Rack Cooking**
This oven comes with all the racks needed to cook a wide variety of foods: a steam tray, a roasting rack and a baking/drip tray. Plus, with steam, you can cook two or more types of foods at once without the flavors of one food transferring to another.

---

**Water Reservoir**
With this removable reservoir, supplying your oven’s steam generator with water couldn’t be easier. Rather than plumbing the oven, simply fill the reservoir with tap water, place it back into its compartment, and close the oven door.

---

**IMPORTANT:** Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions included with your appliance before selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.
The Height of Gourmet Potential, the Peak of Performance

Bring bold, commercial styling and exceptional performance into your kitchen with Pro-Style® rangetops. Five models are available in the most common 48-, 36- or 30-inch sizes. Each rangetop offers unique features, including a downdraft rangetop.

Power to Boil Quickly, Precision to Melt Gently

Jenn-Air® Pro-Style® rangetops offer great variety and versatility with either four or six burners. Each model features one or two 20,000 BTU stacked PowerBurners which provide the high heat needed for cooking methods such as flash frying and wok cooking. 15,000 BTU burners meet the demands of everyday cooking, and for delicate tasks like melting chocolate, a 5,000 BTU simmer burner provides even, low-output heat that prevents scorching and reduces to as low as 500 BTUs.

Enjoy the Elements of a Professional Kitchen

We created our Pro-Style® rangetops to meet the demands of gourmet cooks seeking appliances similar to those in restaurant kitchens. Select models feature an even-heating electric griddle which gives you the flexibility to expand your repertoire of cooking techniques. Electronic ignition and Flame-Sensing™ re-ignition ensure a continuous flame that re-ignites automatically if blown out – even at the lowest setting.

Professional Style, Premium Function

Ceramic-coated cast-iron grates form a continuous surface over our high-powered rangetops, hold cookware securely and allow easy transfer between burners of different outputs. The heavy-gauge cast-iron grates give our rangetops a solid, distinctly professional appearance, complementing the powerful burners and Pro-Style® controls, making our rangetops an attractive option.
48” Pro-Style® Rangetop with Griddle
JGCP548WP – 48”
• Two 20,000 BTU stacked PowerBurners
• Electric griddle (1,320 watts)
• Three 15,000 BTU burners
• 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
• Electronic ignition and Flame-Sensing™ re-ignition

Overall Product Dimensions
47 7/8” w x 28 3/8” d

36” Pro-Style® Rangetop with Griddle
JGCP536WP – 36”
• 20,000 BTU stacked PowerBurner
• Electric griddle (1,320 watts)
• Two 15,000 BTU burners
• 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
• Electronic ignition and Flame-Sensing™ re-ignition

Overall Product Dimensions
35 3/4” w x 28 3/8” d

36” Pro-Style® Rangetop
JGCP436WP – 36”
• Two 20,000 BTU stacked PowerBurners
• Three 15,000 BTU burners
• 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
• Electronic ignition and Flame-Sensing™ re-ignition

Overall Product Dimensions
35 3/4” w x 28 3/8” d

5,000 BTU Simmer Burner
The simmer burner provides even, low-output heat that prevents scorching and can be reduced to as low as 500 BTUs for delicate tasks such as melting chocolate.

30” Pro-Style® Rangetop
JGCP430WP – 30”
• 20,000 BTU stacked PowerBurner
• Two 15,000 BTU burners
• 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
• Electronic ignition and Flame-Sensing™ re-ignition

- Grill Grate Finish
- Style Option (add letter to end of model number)
  - Pro-Style® Stainless

A. Depth includes knobs.
B. 5” diameter round ducting may be used if duct length is 10’ or less.
C. LP kit included. Gas rangetops are factory set for natural gas. Consult online Installation Instructions for LP BTU ratings.

### IMPORTANT:
Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to Installation instructions packaged with product before selecting cabinetry, making cutouts, or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL, or CSA approved.
Fine-Tuned Innovation

Our line of exquisite cooktops spans from downdraft cooktops innovated by Jenn-Air brand to our newest, powerful gas cooktops that unite precision control with exceptional styling. Their extremely low-profile allows near-flush installation. Jenn-Air® induction cooktops offer a new level of cooking performance and a fresh face of refinement for the kitchen. Modular downdraft cooktops give a customized approach to cooking, while stylish conventional gas or electric models heat up any kitchen design.

Revolutionary JX3™ Downdraft Cooktops Offer Design Freedom

Jenn-Air brand has been at the forefront of innovation since introducing cooktops with downdraft ventilation in the 1960s. Instead of requiring an overhead hood, downdraft cooktops capture smoke, steam and odors at the cooking surface. JX3™ downdraft cooktops are optimized to offer the ideal balance of cooking and ventilation performance. These cooktops also give you more design freedom with an exclusive duct-free kit accessory that allows installation in any home – even a high-rise or condominium.

Modular or Fixed, Downdraft Cooktops Allow for Flexibility

Expressions™ Collection and Designer Line downdraft cooktops offer great flexibility with modular and traditional fixed designs. With a built-in downdraft ventilation system, these cooktops make it easy to create an open kitchen design while keeping the air in your kitchen fresh and clean. Cooktops with a modular design feature open bays or replaceable grills that allow customization with a variety of accessories.

Induction Cooktops Deliver the Best of Both Worlds

Our induction cooktops feature exceptional power and superb responsiveness, delivering fast and consistent results. Induction cooktops cook like gas, look like electric and outperform both. With cooking power that exceeds many commercial-style gas cooktops, induction cooktops turn cookware into the heat source, so little heating power is wasted. Temperature control is so precise you’ll love the consistent, quality results.
Duct-Free Kit

Imagine a kitchen without boundaries. With the optional duct-free kit, our JX3™ gas and electric downdraft cooktops can be installed in any home – even a high-rise or condominium – without requiring a remodel.
Cooking

E-ven Heat™ Grill
Grill indoors year-round with the E-ven Heat™ grill. Featuring an "E"-shaped burner that delivers even heat across the entire grill surface, this grill works efficiently with the downdraft ventilation system.

Modular Cooktop Design
Expressions™ Collection modular electric cooktops can be customized to fit your cooking style with interchangeable accessories and cartridges – from an additional grill to radiant or coil elements. See pages 62-63 for more details.
45" Designer Line Modular Electric Downdraft Cooktop  
**JED8345AD – 45”**  
**Style Option:**  
- Modular design  
- Downdraft ventilation system with 2 speeds

- Ships with Open Bay

30" Designer Line Modular Electric Downdraft Cooktop  
- 30" w x 213/4" d  
- Ships with Open Bay

30" Induction Cooktop  
- 30" w x 213/4" d  
- Ships with Open Bay

Induction Technology  
Jenn-Air® Induction.  
Cooks like gas, looks like electric, outperforms both.  
Heat created directly in the cookware makes it the heat source which, in turn, cooks the food. And, with the touch of a button, the Sensor Boil feature will bring even large stockpots quickly to a boil.

Cooktop and Ventilation Pairings, page 133
36” Gas Cooktop

JGC7636B – 36”

Style Options:
- 18,000 BTU PowerBurner
- Simmer burner
- Single point electronic ignition and Flame-Sensing™ re-ignition
- Three 15,000 BTU burners
- 6 sealed brass burners
- Low-profile design enables near-flush installation

30” Gas Cooktop

JGC7530B – 30”

Style Options:
- 18,000 BTU PowerBurner
- Simmer burner
- Single point electronic ignition and Flame-Sensing™ re-ignition
- Three 15,000 BTU burners
- 5 sealed brass burners
- Low-profile design enables near-flush installation

Overall Product Dimensions
30” w x 21” d

Low Profile Design

Nearly flush with the countertop, the new Jenn-Air® gas cooktops provide an integrated transition from countertop to the cooktop with an exceedingly low profile of nearly 3 mm. The minimal look has the maximum impact with robust, continuous grates, slightly elevated for optimal cooking efficiency and pan stability. The clean lines of this seamless look complement any kitchen décor.

Find Your Perfect Ventilation Match

Jenn-Air® ventilation systems remove steam, smoke and odors generated by cooking processes to help ensure a fresh, clean kitchen before dinner is served. See pages 132-135 to find a system that fits your cooking surface.

Pro-Style® Knob Kit†

W10678586 (see page 65)
36" Electric Radiant Cooktop with Glass-Touch Electronic Controls

**JEC4536B – 36”**

*Style Options:*

- Glass-touch electronic controls
- 12”/9”/6” Triple-Choice™ element
- 10”/6” Dual-Choice™ element
- Precise Power® function available on all elements
- Simmer, Melt and Keep Warm™ functions available on all elements

Cooktop Accessories

Duct-Free Kit
JDA7000WX
• Allows JX3™ downdraft cooktops to be installed in any home without requiring ductwork
• Ideal for a high-rise or condominium
• Includes duct-free filter

Duct-Free Filter
W10177003
• For use with JX3™ downdraft cooktops and duct-free kit to capture smoke, grease and moisture
• Features a replacement indicator

Two-Element Cartridge – Radiant
AR141
Style Options:

- Textured Black B
- Textured White W

• For use with Expressions™ Collection modular electric downdraft cooktops
• 2,000- and 1,200-watt elements
• Side plug-in connection

Two-Element Cartridge – Coil
AC110
Style Options:

- Black B
- White W

• For use with Expressions™ Collection modular electric downdraft cooktops
• 8” – 2,100-watt and 6” – 1,250-watt elements
• Side plug-in connection

Electric Griddle with Integral Heating Element
AO310
• For use with Expressions™ Collection modular electric downdraft cooktops
• 1,300-watt element
• Side plug-in connection

Energy Saver Electric Grill
AO330
• For use with select Expressions™ Collection modular electric downdraft cooktops
• 2,800-watt grill element and removable liner pan
• Independent control of front and rear sections
• Excalibur® nonstick grill grate finish
• Side plug-in connection

Tempered Glass Grill Covers
AO345
Style Option:

- Black B

• For use with select Expressions™ Collection modular electric downdraft cooktops
• Tempered glass with aluminum backing
• One set included with each electric cooktop
• Can be used as trivets

Two-Burner Module – Gas
JGA8100AD
Style Options:

- Black B
- White W

• For use with Designer Line modular gas downdraft cooktops
• Two 10,000 BTU sealed burners
• One-piece porcelain-on-cast-iron burner grates
• End plug-in connection

Gas Griddle
JGA8200ADX
• For use with Designer Line modular gas downdraft cooktops
• Fits over E-ven Heat™ burner
• Excalibur® nonstick surface
Cooking

Gas Grill Cover

Showcase Your Culinary Expertise

Pro-Style® ranges give you versatile performance and robust commercial styling in a variety of configurations. Choose from three different sizes of dual-fuel or gas ranges, all of which showcase professional power and a convection system that helps you express your culinary creativity.

Pro-Style® Ranges

A Bold Range of Versatility and Precision

Pro-Style® ranges give you more control over everything you want to cook. High-output burners on the cooking surface give you the power needed to bring water quickly to a boil or for temperature-sensitive techniques such as searing and flash frying. The convection system circulates heat throughout the entire oven cavity for even baking and tender roasting. Achieving excellent results is simple – with the industry’s first full color LCD display on a range, you can use advanced technology to touch anywhere on the screen and operate oven functions with unrivaled usability.

Cooking Surface Configuration Options

Among the eight Pro-Style® ranges, you’ll find variations on the cooking surface. Choose either a six- or four-burner model. Every Jenn-Air® Pro-Style® range features at least one 20,000 BTU stacked PowerBurner and a 5,000 BTU burner that turns down to as low as 500 BTUs. If you tend to use a variety of cooking techniques, you may prefer a model with a high-performance griddle that provides even heat distribution for precise results.

Dual-Fan MultiMode® for True Convection

The convection system found on all Pro-Style® ranges provides accurate and consistent temperature management to help you create dishes with excellent results. Two fans disburse heated air throughout the entire oven cavity for the most even coverage on every rack. Dual-fuel ranges offer six convection modes while gas ranges offer five, including Convect Bake for even baking on multiple racks and Convect Roast for moist, tender roasted meats or vegetables.
48" Pro-Style® Dual-Fuel Range with Griddle and Dual-Fan MultiMode® True Convection System

JDRP548WP – 48"
- Dual-fan MultiMode® true convection system
- Two 20,000 BTU stacked PowerBurners
- Electric griddle (1,320 watts)
- Three 15,000 BTU burners
- 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
- 7-inch full color touch-anywhere LCD display
- Auto Convection Conversion

Overall Product Dimensions
47 5/8" w x 36 3/4" h x 29 1/4" d

36" Pro-Style® Dual-Fuel Range with Griddle and Dual-Fan MultiMode® True Convection System

JDRP536WP – 36"
- Dual-fan MultiMode® true convection system
- Two 20,000 BTU stacked PowerBurners
- Electric griddle (1,320 watts)
- Two 15,000 BTU burners
- 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
- 7-inch full color touch-anywhere LCD display
- Auto Convection Conversion

Overall Product Dimensions
35 7/8" w x 36 3/4" h x 29 1/4" d

30" Pro-Style® Dual-Fuel Range with Griddle and Dual-Fan MultiMode® True Convection System

JDRP430WP – 30"
- Dual-fan MultiMode® true convection system
- 20,000 BTU stacked PowerBurner
- Two 15,000 BTU burners
- 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
- 7-inch full color touch-anywhere LCD display
- Auto Convection Conversion

Overall Product Dimensions
29 5/8" w x 36 3/4" h x 29 1/4" d

Industry’s First Full Color LCD Display on a Range
Get the most out of all the oven’s functions. The 7-inch full-color LCD display’s advanced technology allows you to touch anywhere on the display to control virtually all oven settings. Four key menus are precisely organized on each screen for unrivaled usability. Slider technology allows precision temperature adjustment with a swipe of the finger.

20,000 BTU Stacked PowerBurners
Each PowerBurner features two burners stacked in one location on the cooking surface with a maximum output of 20,000 BTUs providing the power for high-temperature cooking techniques such as wok cooking and flash frying.

Pro-Style® Range and Ventilation Pairings, page 134
48" Pro-Style® Gas Range with Griddle and Dual-Fan MultiMode® True Convection System

JGRP548WP – 48”
• Dual-fan MultiMode® true convection system
• Two 20,000 BTU stacked PowerBurners
• Electric griddle (1,320 watts)
• Three 15,000 BTU burners
• 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
• 7-inch full color touch-anywhere LCD display
• Auto Convection Conversion

Overall Product Dimensions
47 7/8” w x 38 3/4” h x 29 1/4” d

36” Pro-Style® Gas Range with Griddle and Dual-Fan MultiMode® True Convection System

JGRP536WP – 36”
• Dual-fan MultiMode® true convection system
• 20,000 BTU stacked PowerBurner
• Electric griddle (1,320 watts)
• Two 15,000 BTU burners
• 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
• 7-inch full color touch-anywhere LCD display
• Auto Convection Conversion

Overall Product Dimensions
35 7/8” w x 38 3/4” h x 29 1/4” d

30” Pro-Style® Gas Range with Dual-Fan MultiMode® True Convection System

JGRP430WP – 30”
• Dual-fan MultiMode® true convection system
• 20,000 BTU stacked PowerBurner
• Two 15,000 BTU burners
• 5,000 BTU simmer burner (reduces to ultra-low 500 BTUs)
• 7-inch full color touch-anywhere LCD display
• Auto Convection Conversion

Overall Product Dimensions

### IMPORTANT: Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions packaged with product before selecting cabinets, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.
Rewarding Creativity with Exceptional Choices

Offering a wide range of options, Jenn-Air® ranges support your creativity and consistently provide exceptional results. Our full-depth ranges fit a standard cutout while providing a built-in, custom look. A variety of high-performance cooking options with all fuel types combined with a baking drawer and a true convection oven make these ranges perfect for entertaining. Select ranges feature our original groundbreaking innovation – the downdraft ventilation system – that eliminates the need for an overhead ventilation hood.

Broadened Capacity, Convection Cooking

The addition of a baking drawer to select Jenn-Air® ranges raises the total baking capacity, providing the freedom to prepare a wide variety of dishes at once while still performing specialty tasks like heating plates and keeping completed dishes warm. The true convection oven ensures even heat throughout the oven cavity by adding a heat element to the convection fan, and Auto Convection Conversion takes the guesswork out of cooking times and temperatures.

Options Tailored to Your Cooking Style

Covering all fuel types – dual-fuel, gas, induction and radiant electric, – Jenn-Air® ranges offer the versatility to match any cooking style. Whether it’s the instant power and control of gas or the exceptional efficiency and versatility of induction, there is a Jenn-Air® range with the fuel type to provide you with what best fits your cooking needs.

Bold Style with a Beautiful Fit

Achieve a built-in look without replacing cabinetry with Jenn-Air® full-depth ranges, designed to fit in a standard range opening. These ranges easily install without a back bridge countertop piece to attractively provide a custom, polished look.
30" Dual-Fuel Range
JDS1450D – 30”

Style Options:
• DuraFinish™ Protection
• Brass burners
• 19,000-BTU Dual-Stacked PowerBurner
• Baking drawer
• True convection
• Telescoping glide rack
• Soft-close oven door

Overall Product Dimensions 29 3/8” w x 36” h x 28 5/16” d

30" Gas Range
JGS1450D – 30”

Style Options:
• DuraFinish™ Protection
• Brass burners
• 19,000-BTU Dual-Stacked PowerBurner
• Baking drawer
• True convection
• Telescoping glide rack
• Soft-close oven door

Overall Product Dimensions 29 3/8” w x 36” h x 28 5/16” d

30" Induction Range
JIS1450D – 30”

Style Options:
• Induction technology
• Baking drawer
• True convection
• Telescoping glide rack
• Soft-close oven door
• Sensor Boil function
• Melt function

Overall Product Dimensions 29 3/8” w x 36” h x 28 5/16” d

30" Electric Range
JES1450D – 30”

Style Options:
• Triple-Choice™ element
• Baking drawer
• True convection
• Telescoping glide rack
• Soft-close oven door

Overall Product Dimensions 29 3/8” w x 36” h x 28 5/16” d

DuraFinish™ Protection
Jenn-Air® dual-fuel and gas full-depth ranges feature DuraFinish™ Protection. This scratch- and stain-resistant protection keeps the cooktop looking brighter and fresher longer by also resisting discoloration and yellowing high-temperature cooking can cause over time.

Over-the-Range Ventilation and Microwave Cooking
Whisk smoke, steam and odors out of your kitchen efficiently with a Jenn-Air® over-the-range microwave oven. Our microwave ovens cook a variety of foods with outstanding results and feature extensive modes and controls. See page 106 for more details.
30" Pro-Style® Modular Dual-Fuel Downdraft Slide-In Range with 2-Speed MultiMode® Convection System

JDS9865BDP – 30”
• Downdraft ventilation system with 2 speeds
• Modular design
• 2-speed MultiMode® convection system
• 16,000 BTU PowerBurner
• Replaceable E-ven Heat™ grill
• Auto Convection Conversion

Accessories and Cartridges for Modular Cooking Surfaces
Customize the surface to fit your cooking needs with interchangeable grills, cartridges and accessories. Add an extra grill, or replace it with a griddle or an additional element or burner cartridge. See pages 93-97 for more details.

Overall Product Dimensions
30¾” w x 37½” h x 28½” d

Versatility and Performance that Transcends Expectations

Jenn-Air® microwave ovens are as versatile as traditional ovens. A range of cooking modes provides outstanding results – from microwave & convection combination cooking to auto sensor steam cook. The full color, menu-driven LCD display will guide you through modes and functions. With intuitive navigation, controls show relevant selections. With an assortment of styles, including built-in, drawer design, countertop and over-the-range microwave ovens, you can find one that fits perfectly into your kitchen.

Convection Cooking in a Microwave Oven

Many Jenn-Air® microwave ovens offer convection cooking modes. A model with Speed-Cook combines the speed of microwave cooking with the convection system and broil element to cook food up to three times faster than traditional cooking methods. Microwave & convection combination cooking gives you the flexibility to cook a variety of preprogrammed foods with results you would expect from a traditional oven.

Drawer Design for Convenient Cooking

This microwave oven with drawer design leaves valuable counter space uncluttered with under counter or in-wall installation options that are ideal for an open kitchen design. The drawer opens and closes automatically with the touch of a button, and its top access allows you to check or stir food without removing the dish. For added flexibility, a Keep Warm™ option allows the microwave oven to operate similar to a warming drawer, keeping finished menu items warm until serving time.

Smart Cooking and Ventilation

Experience smart design that conveniently locates electronic touch controls on over-the-range microwave ovens. The concealed pocket handle easily opens the door to a stainless steel cavity lit by halogen theater lighting.* Using multiple fan speeds and a 300 CFM blower, a built-in ventilation system captures smoke, steam and odors while halogen lights illuminate the cooktop surface. To maintain a fresher kitchen environment, the ventilation system turns on automatically when it senses heat rising from the cooktop below.

**NOTES:**
- A. Depth with door +/– 3/8 inches.
- B. For use when pairing with gas or dual-fuel ranges.
- C. Depth requirements depend upon receptacle and its location within or outside of recommended region. See Installation.
- D. Style Options (add letter to end of model number).
- E. Includes push-button opening.
- F. Includes stainless steel handle with diamond-staining.
- G. Includes slightly curved, stainless steel handle (except drawer model).JMD2124W, JMC3215BS and JMC1116A.
- H. Includes push-button opening.

**Note:**
- A. Not to be installed above a gas cooktop.
An Enticing Choice for Entertaining

Jenn-Air® warming drawers deliver incredible flexibility in the kitchen or any room of the home – even outdoors. An essential for entertaining, our warming drawers keep food warm at a wide range of temperatures, while humidity settings let moist foods stay moist and crisp foods crisp. In addition, you can warm plates, proof bread or even slow roast.

Beyond Warming: Slow Roasting

Enjoy the versatility of the Slow Roast function which allows you to roast foods such as beef, pork and poultry over a long period of time in the warming drawer with tender, moist results. It cooks and roasts foods slowly at a low temperature and features two settings, resulting in flexible slow roast options.

Moist to Crispy, Perfect Results

Two humidity settings allow you to precisely control the moistness or crispness of food. The control allows you to open or close the vent slots in the door. The Moist setting holds moisture in the drawer to keep food soft, while the Dry setting allows steam and moisture to escape from the drawer to keep food crispy.

Ideal Setting for Perfect Proofing

This specialized warming drawer function provides a controlled environment for proofing bread with excellent results. It prepares dough for baking by activating the yeast and allowing bread and rolls to rise at a low temperature.
30” Warming Drawer

**JWD2030W – 30”**

**Style Option:**
- Slow Roast function
- Humidity slide control
- Bread Proofing function
- Full-extension drawer with roller glides
- Approved for indoor/outdoor use

**Overall Product Dimensions**
293/4” w x 103/8” h x 24” d

**30” Warming Drawer Base Unit**

**JWD2030W – 30”**

**Style Option:**
- Slow Roast function
- Humidity slide control
- Bread Proofing function
- Full-extension drawer with roller glides
- Approved for indoor/outdoor use

**Custom Overlay Design**
Must be ordered separately from a cabinet maker or other manufacturer.

**Coordinating Panel Kits**
Customize the warming drawer to match any of our signature kitchen suite designs with a coordinating panel kit. To do so, you must order one overlay warming drawer base unit JWD2030WX and one of the panel kits shown on page 111.

**Pro-Style® Stainless Panel Kit**

**JWD2130WP**
- Must also order warming drawer base unit JWD2030WX

---

**Combine Your Warming Drawer with a Wall Oven**

A warming drawer is the perfect complement to a Jenn-Air® wall oven. Keep completed dishes at the ideal temperature and texture until you’re ready to serve. Specialized Bread Proofing and Slow Roast functions add flexibility. See pages 30-34 for wall oven options.

---

**Full-Extension Drawer with Roller Glides**

Jenn-Air® warming drawers extend as far as the depth of the drawer. Ball-bearing rollers allow for smooth extension, making it easy to place in or remove large or heavy dishes.

---

**Overall Product Dimensions**
293/4” w x 103/8” h x 24” d

---

*Depth does not include panel kit or custom panel and handle.*
IMPORTANT: Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions packaged with product before selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.

#### DRAWER FEATURES

- Drawer Capacity (cu. ft.) 1.5
- Heating Element Wattage 600
- 2-Position Racks
- Full-Extension Drawer with Roller Glides

#### CONTROL FEATURES

- Slow Roast Function
- Bread Proofing Function
- Convection Controls
- Humidity Slide Control
- Sensor Temperature Control
- Power “ON” Indicator Light

#### OPTIONAL ACCESSORIES

- Coordinating Panel Kit (add to base unit JWD2030WX)
  - Pro-Style® Stainless: JWD2130XP
  - Black Floating Glass: JWD2130VB
  - White Floating Glass: JWD2130WW
  - 1/2 Pan: W10242695A
  - 1/3 Pan: W10242694A

#### EXTERIOR DESIGN FEATURES

- Style Options (add letter to end of model number)
  - Euro-Style Stainless: S
  - Custom Overlay Design: X

### Warming Drawer Accessories

- A. Depth includes handle.
- B. Warming drawer base unit with Black or White Floating Glass panel kit approved for indoor use only.
- C. Includes stainless steel handle with diamond etching.
- D. Includes slightly curved stainless steel handle.
- E. Requires coordinating panel kit or custom panel and handle, not included.

**IMPORTANT:** Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions packaged with product before selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.
To maintain a fresh, clean kitchen environment, Jenn-Air® ventilation systems target smoke, steam, heat and odors generated during the cooking process. Choose from a downdraft model that retracts into the countertop when not in use, such as the strikingly beautiful Accolade™ downdraft ventilation system with an elegant curved design. We also offer sophisticated commercial-style hoods, classic wall- or island-mount hoods, and innovative perimetric hoods. Most styles are available in our signature kitchen suites to create the look you desire.

**Pro-Style™ Hoods Manage Power**

These ventilation solutions are the perfect complement to the power and versatility of our other commercial-style cooking appliances. Jenn-Air® Pro-Style™ hoods have a range of 600 to 1,200 CFM and are capable of handling the requirements of commercial-style cooking surfaces. Select models feature the added benefit of food warming lamps to keep cooked food warm.

**Perimetric Ventilation Makes Power Beautiful**

The slim profile and sophisticated design of perimetric ventilation hoods not only adds a touch of modern elegance to any kitchen, it also makes these canopy hoods particularly effective at extracting cooking vapors from the kitchen. Air is drawn through thin slots near the hood’s perimeter, increasing the amount captured and reducing sound, making these canopy hoods exceptionally quiet.

**Downdraft Ventilation Retracts with Elegance**

In addition to traditional ventilation hoods, Jenn-Air brand offers downdraft ventilation systems that are ideal for kitchens that don’t easily accommodate an overhead vent, such as where a cooktop is installed in a kitchen island or peninsula. To effectively capture smoke, steam, heat and cooking odors from all sizes of cookware, the Accolade™ downdraft ventilation system rises 19 inches above the countertop and the telescoping downdraft vent rises 14 inches. And when they’re not being used, they elegantly retract back into the countertop to maintain open sight lines throughout your kitchen and adjoining living spaces.
36” Accolade™ Downdraft Ventilation System
JXD7836BS – 36”
• 1,200 CFM high-performance in-line blower required (sold separately)
• 4 fan speed settings
• 12-inch rise
• Curved retractable downdraft design

36’/30” Euro-Style Telescoping Downdraft Ventilation
JXD7036YS – 36”
JXD7030YS – 30”
• 600 CFM internally mounted power system
• 4-speed downdraft fan
• 14-inch rise
• Reversible motor box

36”/30” Pro-Style™ Wall-Mount Hood
JXW9036WP – 36”
JXW9030WP – 30”
• 1,200 CFM dual high-performance blowers
• 4 fan speed settings
• 2 food warming lamps (bulbs included)
• 3 halogen lights (bulbs included)

Open Sight Lines
When they’re not being used, downdraft ventilation hoods elegantly retract back into the countertop to maintain open sight lines throughout your kitchen and adjoining living spaces.

Food Warming Lamps
These lamps are available on select Pro-Style™ Stainless ventilation hoods and can be used in combination with the Pro-Style® Stainless backsplash and backsplash with two shelves. The lamps help keep cooked food warm before service when it’s placed on the shelf.

48” Pro-Style™ Wall-Mount Hood
JXW9048WP – 48”
• 1,200 CFM dual high-performance blowers
• 4 fan speed settings
• 2 food warming lamps (bulbs included)
• 3 halogen lights (bulbs included)

36’/30” Pro-Style™ Low Profile Under Cabinet Hood
JXU9136WP – 36”
JXU9130WP – 30”
• 600 CFM high-performance blower
• 4 fan speed settings
• 2 halogen lights (bulbs included)

36” Custom Hood Liner
JXL6536CSS – 36”
• For use with custom applications
• Uses 600 or 1,200 CFM internal or 1,200 CFM in-line blower motor (sold separately)
• Compatible with cooking surfaces up to 105K BTUs (with 1,200 CFM blower)
• 3 fan speed settings
• 4 halogen lights with night light setting (bulbs included)
• 2 dishwasher-safe stainless steel baffle filters
Sound Silencing System
Innovative technology brings a distinct level of silence to premium hoods while maintaining high performance. The Jenn-Air® sound silencing system found on select hoods optimizes air flow, increasing the amount of air taken in and decreasing the noise emitted. You’ll never have to worry about disrupting pre-dinner conversation with this noise-reduction system.

Perimetric Extraction
This sophisticated design is not only attractive, it is the secret behind the ventilation system's exceptional performance and quiet operation. Cooking vapors are efficiently captured by drawing air through thin slots, speeding the air and improving ventilation performance.
36" Pyramid-Style Island-Mount Canopy Hood
JXI8536DS – 36"
- Perimetric extraction
- 600 CFM high-performance blower
- Manual 3-speed selection
- Boost function
- LED task lighting
- Upward facing LED ambient lighting

36"/30" Pyramid-Style Wall-Mount Canopy Hood
JXW8536DS – 36"  
JXW8530DS – 30"
- Perimetric extraction
- 600 CFM high-performance blower
- Manual 3-speed selection
- Boost function
- LED task lighting
- Upward facing LED ambient lighting

30" Over-the-Range Microwave Oven with Convection
JMV9196C – 30"
Style Options:
- Convection and microwave combination cooking
- 53 menu programs
- 1,600-watt convection element fan
- Perimetric extraction
- 6-level, built-in exterior exhaust system

LED Ambient Lighting
Upward-facing LED lighting gently illuminates the kitchen by projecting ambient light up onto the ceiling and walls, creating a soft, elegant glow. Available on JXI8536DS, JXW8536DS and JXW8530DS.

Overall Product Dimensions
36" w x 32½-½” h x 27” d

Overall Product Dimensions
36" w x 24½-⅜” h x 19½” d
30" w x 24½-⅜” h x 19½” d

Overall Product Dimensions
29³/₈” w x 17¾” h x 16¾” d

6-Level Built-In Exterior Exhaust System
This system helps maintain a pleasant living environment as the ventilation fan automatically activates when the temperature around the microwave gets too high. Additionally, these microwave ovens can be vented three ways: out the top, out the back or re-circulated utilizing a charcoal filter.

Overall Product Dimensions
29³/₈” w x 17¾” h x 16¾” d
Stainless Steel Backsplash with Two Shelves
W10285449 – 48”
W10285448 – 36”
W10285447 – 30”
• Adds to commercial styling of Pro-Style™ hoods
• Protects the wall behind a cooking surface
• Shelves can be used for ingredient placement or plate staging/warming

Full-Width Chimney Cover – 12” Height
W10272081 – 48”
W10272080 – 36”
W10272079 – 30”
• Coordinates with Pro-Style™ hoods
• Covers the chimney for a seamless look
• Complements the look of commercial-style appliances

1,200 CFM Internal Blower Motor
UXB1200DYS
• For use with custom hood liner JXL6536CSS
• Exhausts 1,200 CFM/Rated up to 108,000 BTUs
• 3 speed levels
• 10” round duct

600 CFM Internal Blower Motor

Fresh-Thinking Refrigeration

Elevated style and performance are hallmarks of Jenn-Air® refrigerators, and we’ve gone one step further by introducing the exclusive Obsidian interior on all our built-in French door and bottom mount refrigerators. In addition to keeping food and ingredients in ideal conditions, Jenn-Air® built-in refrigerators feature the industry’s most fully integrated and flush configurations.* Our freestanding refrigerators give you the choice of counter- or standard-depth designs, and Jenn-Air brand supports your love of entertaining with a collection of fully flush, under counter models that provide convenient storage options.

* Based on refrigerator/freezer configurations.
Jenn-Air® built-in refrigeration offers models that complement your great taste. Let your built-in refrigerator blend in beautifully or become a striking focal point in your kitchen. Your choices include French door, bottom-freezer and side-by-side configurations with or without an ice-and-water dispenser. Fully integrated refrigerators allow you to add a coordinating stainless panel kit to match other Jenn-Air® appliances or custom wood door to blend seamlessly with surrounding cabinetry.

Enjoy Fully Integrated and Flush Design
Now you see them. Now you don’t. Jenn-Air® fully integrated built-in refrigerators accept custom overlay panels that help them to virtually disappear into a custom 25-inch deep cutout. You can choose to add a coordinating stainless panel kit or install custom panels to match your cabinetry. The fully integrated and flush design is available in five configurations. Industry-exclusive side-by-side models are available in 48- and 42-inch widths. Other fully integrated and flush refrigerators include 42- and 36-inch French door models and 36-inch bottom-freezer options with a right- or left-hand door swing.

Truly Indispensable Built-In Refrigerators
Our 48- and 42-inch wide side-by-side built-in refrigerators feature an integrated ice-and-water dispenser that offers the choice of cubed or crushed ice. Capacitive touch controls enhance the sleek exterior and showcase easy-to-use, advanced performance.

Ideal Conditions for Each Compartment
French door and bottom-freezer refrigerators that feature our industry-exclusive Obsidian interior make food look its best while our Twin Fresh™ climate control system keeps it fresh. Using sequential dual evaporators and a single variable speed compressor, the system creates cool, humid air in the refrigerator and produces dry, frigid air in the freezer with no transfer of air between the two compartments.
48”/42” Fully Integrated Side-by-Side Base Unit
JS48NXFXDW – 48”
JS42NXFXDW – 42”
• Flush design with articulating hinge
• Precision Temperature Management™ system with variable-speed compressor
• Advanced Climate Control drawer
• Elegance Shelving (adjustable)

Custom Overlay Design
Requires custom panels and handles, not included. Custom panels and handles must be ordered separately from a cabinet maker or other manufacturer. Handle kits available to coordinate with Pro-Style® suite and Euro-Style suite. See page 144.

Coordinating Stainless Panel Kits
Customize your refrigerator to match our Pro-Style® or Euro-Style kitchen suite designs with a coordinating stainless panel kit. To do so, you must order one refrigerator base unit JS48NXFXDW or JS42NXFXDW and one of the panel kits.

36” Fully Integrated Bottom-Freezer Base Unit
JB36NXFXRE – 36” with Right-Hand Door Swing
JB36NXFXLE – 36” with Left-Hand Door Swing
• Industry-exclusive Obsidian interior with metal accents
• Flush design with articulating hinge
• Twin Fresh™ climate control system with sequential dual evaporators
• Soft-close crisper drawers

Custom Overlay Design
Requires custom panels and handles, not included. Custom panels and handles must be ordered separately from a cabinet maker or other manufacturer. Handle kits available to coordinate with Pro-Style® suite and Euro-Style suite. See page 144.

Coordinating Stainless Panel Kits
Customize your refrigerator to match our Pro-Style® or Euro-Style kitchen suite designs with a coordinating stainless panel kit. To do so, you must order one refrigerator base unit JB36NXFXRE or JB36NXFXLE and one of the panel kits.

Overall Product Dimensions
48-Inch – 47⅞” w x 83⅞” h x 24” d
42-Inch – 41⅞” w x 83⅞” h x 24” d

42”/36” Fully Integrated French Door Base Unit
JF42NXFXDE – 42”
JF36NXFDCE – 36”
• Industry-exclusive Obsidian interior with metal accents
• Flush design with articulating hinge
• Twin Fresh™ climate control system with sequential dual evaporators

Coordinating Stainless Panel Kits
Customize your refrigerator to match our Pro-Style® or Euro-Style kitchen suite designs with a coordinating stainless panel kit. To do so, you must order one refrigerator base unit JB36NXFXRE or JB36NXFXLE and one of the panel kits.

Base Unit + Panel Kit = Finished Refrigerator

Customize these built-in refrigerators to match our kitchen suite designs with a coordinating panel kit. To do so, you must order one of the built-in refrigerator base units (left column) and one of the panel kits from the desired design suite. The kits include refrigerator door panels and pre-installed handles.

**Overall Product Dimensions**

48-Inch – 48 1/8” w x 83” h x 27 3/4” d
42-Inch – 42 1/4” w x 83” h x 27 3/4” d

---

**Custom Storage for Your Fresh Ingredients**

The Advanced Climate Control drawer provides the choice for precise, independent temperature control – whether for deli, produce, meats or specialized needs. Inside a climate-controlled drawer, meat can be stored just above freezing, keeping it fresh for grilling. White wine and champagne can be rapidly cooled for serving. Attractive, glass-touch controls provide four settings for maximum flexibility.

---

**Built-In Side-by-Side Refrigerators**

**Complete Your Entertaining Center with an Automatic Ice Machine**

By adding an automatic ice machine to your kitchen, you’re assured of being able to have up to 50 pounds of clear ice available every 24 hours.* Ice machines fit within our Euro-Style Stainless kitchen suite or accommodate a Pro-Style® handle kit. See page 164 for more details.

---

* With the Max Ice option selected.

**IMPORTANT:** Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions packaged with product before selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.
Select Jenn-Air® freestanding refrigerators feature an appealing counter-depth design, meaning only the doors and handles will extend beyond the base cabinet, creating a more integrated design that's ideal when you're entertaining in the kitchen and need room for guests to move. Choose between 69- or 72-inch high models. The 72-inch refrigerators fill possible gaps underneath overhead cabinets. Jenn-Air® freestanding refrigerators include French door and side-by-side configurations.

French door refrigerators provide ample fresh food storage space wide enough to fit large platters. Jenn-Air® French door refrigerators feature both a counter- and standard-depth design, making them suitable for many kitchen configurations.

Side-by-side refrigerators remain the choice for many homeowners. You get equal access to the refrigerator and freezer. Dedicated crisper drawers and deli drawers allow for specialized storage of sensitive ingredients. All Jenn-Air® side-by-side refrigerators feature a counter-depth design with an external ice-and-water dispenser.

Select French door refrigerators feature an exterior dispenser, which allows you to get one of the most preferred features of a side-by-side refrigerator. If you desire an uninterrupted exterior, you can still enjoy filtered water from an internal dispenser in certain models.
72” Counter-Depth French Door Refrigerator with Internal Water Dispenser

- **JFC2290VE** – 72”
  - Style Options*: P, M
- **JFC2290VP** – 72”
  - Style Options*: Y, F
- **JFC2290VT** – 72”
  - Custom Overlay Design: B – Does Not Include Custom Panels or Handles

- 72-inch counter-depth design
- TriSensor™ electronic climate control
- One-hand internal water dispenser
- Glide-out freezer drawer with triple-tiered storage and SmoothClose™ drawer track system

**JFC2290VE Style Options***

The design of this dispenser features a touch pad that allows you to use it with one hand. This creates convenient access to fresh, filtered water while maintaining the refrigerator’s sleek, uninterrupted exterior.

**JFC2290VT Custom Overlay Design**

Requires custom panels and handles, not included:

- Custom panels and handles must be ordered separately from a cabinet maker or other manufacturer.

- Overall Product Dimensions

**JFC2290VP Style Options***

Add Supplemental Refrigeration Where You Need It

Built-in, flush installation for Jenn-Air® under counter refrigerators adds a stylish option and sophisticated convenience to any room of your home. Use the extra storage as a prep area for foods waiting to be cooked or to store beverages and refreshments in a home theater. Options include double-refrigerator and refrigerator/freezer drawer configurations as well as a refrigerator, beverage center or wine cellar. See pages 162-164 for more details.

* For cabinet color, see page 155. / † For Pro-Style® Stainless model JFC2290VEP; d = 30 7/8”. / ‡ Depth does not include custom panels and handles.
69" Counter-Depth French Door Refrigerator with Ice & Water Dispenser

- **JFI2089AE** – 69" Style Option*: P
- **JFI2089WE** – 69" Style Option*: S

  - ExpressFill™ function

72" Counter-Depth Side-by-Side Refrigerator with Ice & Water Dispenser

- **JSC24C8EA** – 72" Style Option: M
  - 72-inch counter-depth design
  - Twin Fresh™ climate control system with sequential dual evaporators
  - Flush cubed/crushed ice-and-water dispenser with white LED lights
  - Ramp-up LED theater lighting

Door-Mounted Ice Dispenser with Removable Bin

The door-mounted ice dispenser is an ideal feature for those who love to entertain. You have easy access to large quantities of fresh, filtered ice, while its location in the freezer door increases usable storage space. The removable bin features a handle and flat bottom, making it easy to serve guests.

Flush Cubed/Crushed Ice & Water Dispenser

Select cubed ice, crushed ice or chilled water. The Measured Fill feature allows you to have the water dispensed in precise amounts of ounces, cups or liters. And the dispenser has the same ramp-up lighting found inside the refrigerator.

* For cabinet color, see page 159.
† Requires custom panels, not included. Custom panels must be ordered separately from a cabinet maker or other manufacturer. Ships with slightly curved, Euro-Style Stainless handles as shown.
**IMPORTANT: Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions packaged with product before selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.**

Understated Elegance, Built-In Convenience

Ideal in an island, but perfect anywhere, Jenn-Air® under counter appliances provide close-at-hand, convenient refrigeration that’s great at the heart of a kitchen prep area or near entertaining space. Your kitchen island will stand out because Jenn-Air® under counter refrigeration blends in with a fully flush, built-in design, fitting seamlessly with adjacent cabinetry. Horizontal handles create visual alignment and integration in any built-in suite.

Under Counter Refrigeration

Top-Drawer Performance

With a design that fits into standard cabinetry, double drawers are a great supplement to a primary refrigerator or perfect for empty-nesters. With space that can be organized more efficiently, double drawers – configured as either two refrigerators or a refrigerator/freezer – open up your kitchen and keep ingredients close at hand for a designated prep area. They’re also convenient in entertainment areas, where the refrigerator/freezer can provide a steady supply of fresh, filtered ice.

Enjoy Elegant Looks and Chilling Grace

Whether you collect wine, entertain frequently or need close-at-hand access to refrigeration for food prep, Jenn-Air® under counter refrigerators, beverage centers and wine cellars meet your needs with elegance and grace. The wine cellar’s extendable racks with natural, beechwood tines gently cradle and chill up to 46 bottles. The beverage center accommodates up to 14 wine bottles, along with beverages, hors d’oeuvres and other ingredients. Make a distinctive statement by combining the three as part of an integrated, built-in suite.

A Fresh, Clear Choice for Entertaining Guests

With the Max Ice option, the Jenn-Air® ice machine can produce up to 50 pounds of ice in a 24-hour period. A 25-pound storage capacity means you’ll always have a continuous supply of ice cubes on hand. Your guests will appreciate the fresh, clear ice thanks to a replaceable water filter that reduces chlorine taste and odor and scale buildup.

* With the Max Ice option selected.
Removable Base-Grille Water Filter

Located behind the base grille, this filter is easily replaceable without opening the drawers. It reduces chlorine taste and odor and scale buildup to provide filtered water for the automatic ice maker in the Refrigerator/Freezer.

Wine Cellar, Beverage Center
Safeguard Your Vintage Collection

Your wine collection will appear to float, gently cradled on beechwood tine racks in either the wine cellar or beverage center. The extendable racks roll out smoothly on ball-bearing glides, even when fully loaded. The wine cellar’s Automatic Interior LED Marquee Lighting provides a soft accent glow along the sides, illuminating each rack to display its full capacity of 46 bottles.

Under Counter Refrigeration to the Max

When in a hurry or getting ready for entertaining, discerning customers know Jenn-Air brand specializes in helping them keep cool about the details. Premium features on the under counter ice machine and the double drawers adjust refrigeration to its lowest settings. Max Ice helps the ice machine produce up to 50 pounds of crystal-clear ice in 24 hours, while Max Cool lowers the double drawer storage temperatures for up to 24 hours while loading groceries or in times of heavy use.

Pro-Style® Stainless Handle Kit

Dishwashers | Make Parties More Sparkling

A dishwasher not only has to look beautiful in your kitchen; it needs to clean beautifully as well. So it’s important to consider the cleaning and drying performance of a dishwasher and how it works – for different types of soils and different types of dishware. Jenn-Air® dishwashers feature the TriFecta™ wash system, providing exceptional cleaning performance, quiet operation and improved energy efficiency. Most importantly, our dishwashers get every load sparkling clean, eliminating even the toughest messes.
Dishwashers | Expect Brilliant Results

Jenn-Air® dishwashers offer an innovative wash system, versatile cycles and options that take cleaning to a whole new level. Our improved sound-silencing system allows you to run the dishwasher without disturbing daily activities or interrupting a dinner party. Premium, capacitive touch controls are activated by your gentle touch, look elegant and contemporary, and allow for easy cleaning. Our new flush dishwasher, with built-in water softener, delivers perfect alignment with adjacent cabinetry, even frameless, European-style cabinets with depths as shallow as 24 inches.

Versatile Performance in Cleaning Dishware

The TriFecta™ wash system conserves water and concentrates cleaning power by alternating washing action between the top and bottom rack. Using a variable-speed motor and pressurized wash arms, it delivers improved cleaning performance and energy efficiency. Three-stage filtration helps optimize water flow while minimizing the amount of food soils re-deposited on dishes for immaculate cleaning. Sensor Wash, the most advanced and versatile cycle on Jenn-Air® dishwashers, senses soil amount, toughness and load size, and then adjusts the cycle for optimal cleaning. Options like Super Scrub add cleaning power by increasing water, wash and soak time, and water temperature.

Active Drying for Better Results

Jenn-Air® dishwashers feature one of two active drying methods on every model: heated drying and heated drying with fan-assisted ventilation, known as Precision Dry® and Precision Dry® Plus. These premium options use the recessed heating element to automatically and precisely pair the optimal drying cycle with your selected wash cycle. They ensure dishes are dry at the end of the cycle. With extra time, you may also conserve energy by turning off the default drying options for condensation drying, letting water naturally evaporate from your dishes.

Designed for Seamless Elegance

Achieve perfect alignment with adjacent cabinetry with depths as shallow as 24 inches by installing a full-size, Jenn-Air® flush dishwasher JDB9600CW – even frameless, European-style cabinets. With a built-in water softener, the dishwasher conditions water to enhance cleaning performance, helps protect the dishwasher from limescale, and reduces spots and water marks on dishes and glasses.
SteamFinish Option

The SteamFinish option, available exclusively on the JDB8500AW, helps avoid the water spot faux pas. A mist of steam before the final rinse helps enhance shine and finish on glassware, while reducing water spots. The SteamFinish option provides outstanding results for tumblers, glass dishware and stemware during Normal, Heavy and Sensor Wash cycles.

Removable 3rd-Level Rack

From spatulas or whisks to ladles, difficult-to-place items can find a perfect spot for cleaning on the removable 3rd-level rack, featured on the JDB8700AW and JDB8600CW. The top-most rack uses RollerGlide™ rails, which allow it to open and close easily – even when fully loaded. This rack also can be used for overflow silverware.
**IMPORTANT:** Dimensional specifications are provided for planning purposes only. Do not make any cutouts based on this information. Refer to installation instructions packaged with product before selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.

Unparalleled Elegance and Ease

Decrease your trash volume and your trips to the trash bin with a stylish Jenn-Air® compactor. You’ll especially appreciate your compactor after dinner parties, holiday get-togethers and any event where there’s an increased amount of discarded items. With several style options available, these discreet compactors can match your other appliances or blend perfectly with your surrounding cabinetry. And with such an attractive exterior, no one would know that a compactor sits hidden behind it. Our compactors also improve the appearance outside your home by reducing the amount of trash in your outdoor receptacles on collection day.

Compactors
Elegant, Discreet Cleanup

Beautifully complement the décor of your kitchen. Jenn-Air® luxury compactors are available in a variety of style options. Choose from the attractive Euro-Style Stainless model with an elegantly-curved handle, or panel kits that are available in Black, White, Black Floating Glass, and Pro-Style® Stainless with bold commercial styling and a diamond-etched handle. A Custom Overlay Design option is also available, which lets your compactor blend with your cabinetry for a seamless, integrated look.

2,300 Pounds of Cleanup Power

How can you make a night of entertaining a little easier? Let a Jenn-Air® compactor assist your cleanup efforts by reducing your trash volume up to 80 percent.* When you select the Compress option, 2,300 pounds of continuous pressure is applied to the contents, discreetly eliminating messes and ensuring contents stay compressed.

Fan with Charcoal Filter Keeps Kitchens Fresh

Because you and your guests expect a fresh and clean kitchen environment, all Jenn-Air® compactors feature an odor-control fan and charcoal filter to help remove any stubborn, unwanted odors in the air.

Pedal-Assisted Convenience

Your hands are full during dinner-party cleanup, so your Jenn-Air® compactor gives you a full-width foot pedal that lets you open and start it quickly and easily with minimal use of your hands.

* When Compress option is selected.
**15" Compactor**

**TC707 – 15"**

**Style Option:**
- Compress option
- 5:1 compaction ratio*
- Anti-jam and tilt sensors
- Fully integrated console

**Custom Overlay Design**

Must be ordered separately from a cabinet maker or other manufacturer.

**Coordinating Panel Kits**

Customize your compactor to match any of our signature kitchen suite designs with a coordinating panel kit. To do so, you must order one compactor base unit TC607X and one of the panel kits. Shown on pages 185-186.

**Overall Product Dimensions**

15" w x 341/8" h x 261/4" d

*With Compress option selected. † Depth does not include panel kit or custom panel and handle.

---

**Pro-Style® Stainless Panel Kit**

W10197421

- Must also order compactor base unit TC607X
- Coordinates with Pro-Style® Stainless appliances
- Includes compactor panel and handle

---

**Black Floating Glass Panel Kit**

W10267300

- Must also order compactor base unit TC607X
- Coordinates with Black Floating Glass appliances
- Includes compactor panel and handle

---

**Compress Option**

This option on select models allows you to discreetly eliminate messes and simplify kitchen cleanup. When selected, the steel compactor ram applies 2,300 pounds of continuous pressure to the contents, reducing trash volume by up to 80 percent.*

* With Compress option selected.

Speed-Cook A comprehensive four-in-one cooking system that combines the speed of microwave energy with convection and broiling to cook oven-quality meals up to three times faster than traditional cooking methods.

Stacked PowerBurners A combination of two individual burners stacked in one location on the cooking surface that delivers the power required for high-temperature cooking techniques such as wok cooking and flash frying.

Steam Cleaning Mode A maintenance mode that softens hard food particles inside the oven, enabling cooks to easily wipe them away using water, mild detergent and a soft cloth.

Steam Mode A fast cooking method that retains nutrients, flavors and moisture to bring out the best qualities in foods.

Steam Plus Convection Mode An oven mode that uses both convection and steam to speed the cooking process, help food retain its own moisture and flavors, and produce a brown, crispy exterior.

Steam Reheat Mode An oven mode that uses steam to warm foods evenly without drying them out.

Steam Tray (Perforated Pan) A perforated tray ideal for cooking with steam and preparing foods like fish, vegetables and potatoes.

SureFlame Ignition Protection SureFlame ignition protection prevents the burner flame from being extinguished by a sudden draft.

Ultra-High Output Burner A high-output burner that reaches 15,000 to 20,000 BTUs of power at its ultra-high setting.

Ultra-Low Output Burner A burner that reaches a maximum power level of 5,000 BTUs and reduces to a low setting to maintain the temperature needed for delicate items.

Under Counter Installation A single oven that can be installed under the counter without cutting into the toe kick.

V2® Vertical Dual-Fan Convection System The convection system on Jenn-Air® wall ovens that features a 2,800-watt bake element, 3,600-watt broil element, two convection elements totaling 6,800 watts and two dual-speed fans.

Variable Temperature Broil Oven mode designed for choosing Low or High broil, or a temperature between 300°F and 550°F to deliver more precise control.

Warming Center Element A 100-watt element that keeps finished menu items warm until they are ready to be served or while other items finish cooking.

Warming Drawer with Preset Temperature Settings A drawer below the oven that can be used for warming bread and plates or to keep cooked food warm.

Yogurt Mode A preset mode used for making homemade yogurt from milk and a yogurt culture.

Beverage Chiller™ Compartment A wall oven display that you can touch anywhere to precisely access and organize anywhere to precisely access and organize.

Beverage Chiller™ Compartment A comprehensive four-in-one cooking system that combines the speed of microwave energy with convection and broiling to cook oven-quality meals up to three times faster than traditional cooking methods.

Capacity Touch Controls USB Light Switches and alert chimes, uses approved ice maker cleaner to clean the ice machine, reduce mineral scale buildup and help maintain efficient performance.

Display Lighting Option A feature that enables interior lighting to remain on when the door is closed to display contents on under counter beverage centers and wine chillers.

Door/Drawer Open Alarm The alarm will chime if a door or drawer is left open for more than 10 minutes (15 minutes on ice machine).

Door-Mounted Ice Dispenser with Removable Bin A removable ice bin, located in the freezer door, makes it easy to access ice. The bin is designed with a handle and flat base to accommodate serving.

Dual Temperature Zones Zones allow food, beverages and wine with varying temperature requirements to be refrigerated within beverage centers or wine chillers.

Energy-Saving Operation An energy-saving feature that automatically detects buildup and switches to defrost only when necessary.

Automatic Defrost An energy-saving feature that automatically detects buildup and switches to defrost only when necessary.

Automatic Ice Maker Automatic ice maker provides a continual supply of fresh, filtered ice. Select models include a bin and ice scoop for added convenience.

Automatic Interior Light The interior light comes on any time the door is opened. The on/off switch is located beside the temperature control knob on the base grille.

Automatic Pre-Emptive Defrost This defrosting method monitors and remembers usage patterns for the refrigerator and performs the defrost function prior to heavy usage. It is highly energy efficient and helps protect against damaging temperature extremes.

Beverage Chiller™ Compartment A door compartment on select Jenn-Air® French door refrigerators that helps preserve freshness by keeping frequently accessed beverages at a temperature up to four degrees colder than the rest of the refrigerator.

Bottom-Freeze Refrigerator A storage refrigerator where the freezer compartment is on the bottom and the refrigerator compartment is on the top.

Built-In or Freestanding Installation Designed for built-in or freestanding installation to accommodate an existing space or work with the layout of a room.

Capacitive Touch Controls Elegant controls, which are activated by a finger's touch and make for simple cleaning.

Clean Cycle Indicator Automatic cycles, promoted by indicator and alert chimes, uses approved ice maker cleaner to clean the ice machine, reduce mineral scale buildup and help maintain efficient performance.

Refrigeration (continued)

E

Electronic Controls with LED Display

Electronic controls that make it easy to independently adjust and verify temperatures. The controls include intuitive performance features such as Max Cold and Sabbath Mode.

Electronic Ice and Water Dispenser with LCD Display

The dispenser features a sleek, monochromatic design and a QuickMeasure function which displays the amount of water dispensed in ounces, cups or liters.

ENERGY STAR® Qualified

Jenn-Air® refrigerators that meet ENERGY STAR® requirements exceed minimum federal energy standards, per ENERGY STAR® specifications. ©ENERGY STAR® is a U.S. registered mark.

ExpressFill™ Function

An one-button function on select models which allows simultaneous dispensing of ice and water and is ideal for containers with narrow openings.

F

French Door Refrigerator

A style of refrigerator where the freezer compartment is on the bottom and the refrigerator compartment is on two doors that open side-by-side.

Fully Extendable Soft-Close Drawers

An innovative design that allows under counter double drawers to extend smoothly and open completely. The Soft-close system ensures drawers close gently.

Fully Integrated and Flush Design

A build-in refrigerator design that blends seamlessly with adjacent cabinetry, creating an integrated appearance. Fully integrated means there are no hinges or trim pieces exposed, and flush means the refrigerator is even with adjacent cabinetry for an attractive appearance.

G

Glide-Out Drawer with SmoothClose™ Drawer Track System

A bottom-mount freezer drawer that provides smooth, easy operation – thanks to a sturdy design and precision ball bearings.

Gravity Drain

A system that drains excess water in the under counter ice machine without the need to monitor and empty water manually.

H

Holiday/Rest Mode

This feature allows the door of the refrigerator or freezer to be opened or closed during the Sabbath or other religious holidays without directly turning on or off any lights, digital readouts, solenoids, fans, valves, compressor, icons, tones or alarms.

I

Integrated Cubed/Crushed Ice and Water Dispenser

An external dispenser option featured on select built-in side-by-side refrigerators.

Interactive Capative Touch Controls

L

LCD Dispenser Display with Touch-Activated Controls

An external dispenser display that provides the ability to independently control internal temperatures, allowing at-a-glance verification without opening the refrigerator doors. The LCD display responds to the touch, guiding you through each selection.

LED Temperature Display

The LED display provides constant feedback on each temperature zone inside the unit.

LED Theater Lighting

N

Marquee Lighting

Soft, marquee-style accent LED lighting extends along both sides of the wine cellar, illuminating the interior any time the door is opened or when the Display Lighting option is selected.

Max Cold/Cold Option

A selectable feature that lowers internal temperatures for 24 hours for loading groceries or times of heavy use.

Max Ice Option

A selectable option that increases ice production during times of heavy use (and automatically at start-up). When selected for the ice machine, the temperature automatically adjusts to its lowest setting.

O

Obisidian Interior Finish

The exclusive dark, Obsidian interior showcases food items throughout the refrigerator, including matching crisper drawers and freezer.

One-Hand Internal Water Dispenser

A water dispenser that provides convenient access to fresh, filtered water and requires only one hand to operate.

P

Panel-Ready Design

Dryer handles and/or factory-installed door trim only. Custom panels must be ordered separately.

Precision Temperature Management System

A sensor-controlled system that uses a single variable-speed compressor with an independent sensor in each compartment to monitor and adjust temperatures.

Produce Preserver

Q

Quarter Sensor™ Climate Control System

A temperature control system that features four temperature sensors. The sensors work to maintain consistent climate control for outstanding food preservation.

QuickMeasure Function

A dispenser function on select built-in side-by-side refrigerators. This function rapidly dispenses water and displays the amount of water dispensed.

Removable Base-Grille Water Filter

A filtration system which includes a water filter located on the base grille of the refrigerator. The filter reduces chlorine taste and odor and scale build up.

Reversible Door Swing

Gives you flexible installation options by allowing hinges to be installed on either side of the door.

S

Sabbath Mode

This feature allows the door of the refrigerator or freezer to be opened or closed during the Sabbath or other religious holidays without directly turning on or off any lights, digital readouts, solenoids, fans, valves, compressor, icons, tones or alarms.

Sabbath Mode

A selectable feature that lowers internal temperatures for 24 hours for loading groceries or times of heavy use.

Max Cool/Cold Option

A selectable option that increases ice production during times of heavy use (and automatically at start-up). When selected for the ice machine, the temperature automatically adjusts to its lowest setting.

O

Q

Quarter Sensor™ Climate Control System

A temperature control system that features four temperature sensors. The sensors work to maintain consistent climate control for outstanding food preservation.

QuickMeasure Function

A dispenser function on select built-in side-by-side refrigerators. This function rapidly dispenses water and displays the amount of water dispensed.

Removable Base-Grille Water Filter

A filtration system which includes a water filter located on the base grille of the refrigerator. The filter reduces chlorine taste and odor and scale build up.

Reversible Door Swing

Gives you flexible installation options by allowing hinges to be installed on either side of the door.

S

Sabbath Mode

This feature allows the door of the refrigerator or freezer to be opened or closed during the Sabbath or other religious holidays without directly turning on or off any lights, digital readouts, solenoids, fans, valves, compressor, icons, tones or alarms.

Sealed Crisper Drawers with Adjustable Humidity Control

Individual storage drawers help maintain crispness of fruits and vegetables, and allow adjustment of humidity levels, depending on the ingredients.

72-Inch Counter-Depth Design

Three inches thinner than a traditional 69-inch refrigerator, the extra height fills the gap usually left at the top when installed under standard cabinetry. The depth of the refrigerator cabinet enables it to align closely with kitchen cabinetry for a built-in look.

Spill-Proof, Adjustable Glass Shelves

Clear glass shelves with raised edges help to contain spills and leaks and can be adjusted to meet individual storage needs. Select refrigerators feature adjustable shelves that slide out for convenient access.

Spill-Proof, Fixed Glass Shelf

A glass shelf with a lip around all four sides to help contain spills that may overflow.

Stability-Enhanced Freezer Basket

An upper wire shelf that slides out for easy access and viewing. The shelf is mounted to a glide system to provide enhanced stability and ensure easy operation.

Stainless Steel Clad Ice and Water Dispenser

An external dispenser option that integrates into the door for a sleek, aesthetically pleasing appearance. Featured on select French door refrigerators.

T

Temperature-Controlled Gourmet Bay™

Drawers with Self-Opening Lid

A storage drawer with an adjustable temperature control that allows chilled air to circulate around the drawer, keeping foods stored inside cooler than the rest of the fresh food section. Helps keep contents such as deli or dairy items fresh longer and also helps protect foods from drying out due to the indirect airflow.

TriSensor™ Electronic Climate Control

A temperature control system that features sensors in the fresh food and freezer compartments and an external ambient room temperature sensor that provides exceptional, consistent climate control.

Twin Fresh™ Climate Control System

A temperature management system that features sequential dual evaporators to create independent climate controlling systems for optimum humidity and temperature control.

U

UV-Resistant Thermal Glass Door

V

W

Water Filter Cartridge

Dishwashers

Built-In Water Softener

The built-in water softener softens water to optimal hardness level to enhance performance, help protect the dishwasher from limescale, and reduce spots and water marks on dishes and glasses.

Capative Touch Controls

A selectable option that disables the control functions to prevent unintended operation.

Cycle Status Light

Projects a red, LED light onto the floor when the dishwasher is running and shuts off when dishes are ready.

Detergent Tab Tray

An upper-rack tray on the3 flush dishwasher designed to hold detergent or tablets in place for a dedicated spray jet to dissolve slowly and more efficiently.

Dual Wattage Heating Element

The dual wattage heating element helps to provide high-performance drying. It also provides the necessary power to heat water for the Sanitize option.

Dishwashers

**Glossary**

**ENERGY STAR® Qualified** Jenn-Air® dishwashers that meet ENERGY STAR® requirements exceed minimum federal energy standards, per ENERGY STAR® specifications, effective January 20, 2012. **ENERGY STAR** is a U.S. registered mark. **Exterior Cycle Indicator** An exterior cycle indicator light located on the front of select dishwashers displays three colors to give intuitive feedback on the cycle status. **Fully Integrated Console** This console’s intuitive design locates the touch controls on the door’s top surface for a clean appearance.

**Light Item Clips** Repositionable clips that secure lightweight items during the wash cycle, preventing overturning or falling through the racks. **Manual Upper Rack Adjusters** Upper rack adjustment system enabled by removing the rack then reinserting it into the dishwasher at a different height, creating an optimal loading space for a variety of dish and cookware sizes. **Normal Wash Cycle** A cycle that is used for normal amounts of food soil. The energy-usage label is based on this cycle. **Nylon Racks with Ball-Tip Tines** Covered and angled to create dishwasher and help prevent dishes from touching each other during the wash cycle. The extra cushioning on the tip of the tines protects dishes from scratches. **Open/Start Pedal** A folding shelf on the upper rack that adds additional wash performance, extra water and higher temperatures to enhance the selected cleaning cycle. **Partial Load Option** An option on the flush dishwasher that softens water and removes minerals to enhance performance and protect from water spotting. **Precision Dry® Option** A selectable dishwasher option that chooses the optimum dry cycle based on the type of load washed. This option activates a dual-wattage heating element, which provides radiant heat and helps ensure dry dishes at the end of the drying cycle. **Precision Dry® Plus Option** A selectable dishwasher option that chooses the optimum dry cycle based on the type of load washed. This option activates a ventilation fan that draws dry air into the dishwasher, and the dual-wattage heating element helps to provide radiant heat and to ensure dry dishes. **Premium Upper Rack Adjusters** Premium upper rack adjustment system makes it easy to raise the rack by simply lifting it or lower the rack by pressing the adjusters (without removing the rack from the dishwasher). Creates an optimal loading space for a variety of dish and cookware sizes. **Removable 3rd Level Rack with RollerGlide™ Rails** This three-level, topmost rack provides room for difficult-to-place items, which neither fit ideally in the silverware basket nor in the other racks. **Rinse Only Cycle** A cycle that rinses soiled dishes, glasses and silverware without detergent, and can be added when the upper rack is removed to provide targeted wash action for extra tall items. **Stainless Steel Tall Tub** The high-grade stainless steel interior is elegant, durable and resists discoloration and energy. **S-Stem Finish Option** Reduces water spots by generating a mist of steam before the final rinse cycle to help enhance shine and finish on glassware. **Super Scrub Option** Super Scrub option provides an increased water temperature during washing and/or additional wash time for hard-to-remove soils. **SteamFinish Option** A turbidity sensor monitors water clarity as all wash cycles progress, shutting off water to clean dishes, detecting changes in water temperature to determine load size. A turbidity sensor monitors water clarity to detect load size and a microprocessor adjusts the water temperature to match the dish soil level, and help save water and energy. **Super Scrub Option** Super Scrub option provides an increased water temperature during washing and/or additional wash time for hard-to-remove soils.

**TriFecta® Wash System** The powerful, quiet and energy-efficient wash system, found on all Jenn-Air® tall tub dishwashers, features alternating wash action in dual wash zones, three-stage filtration, a variable-speed motor and pressurized wash arms. **WaterLock™ Plus Flood Protection Technology** A comprehensive system on the flush dishwasher that uses a double-lined water hose, a safety valve and float switches that are all wired to detect a reduction in water pressure in the event of a leak and shut off water to the dishwasher, preventing water from flooding the kitchen or damaging the electrical system. Featured on: JDB8100AW, JDB8150AW, JDB8200AW and JDB8000AW.

**Wash Only Cycle** A cycle that rinses soiled dishes, glasses and silverware without detergent, for later washing.

**WaterLock™ Flood Protection** A selectable option that constantly keeps the ram at the bottom of the compactor to maintain pressure on the contents. **WaterLock™ Plus Flood Protection Technology** A technology that detects an electronic malfunction in the dishwasher and prevents water from flooding the kitchen or damaging the electrical system by shutting off water to the dishwasher. **Wire Cup Shelf with Integrated Stemware Holders** A folding shelf on the upper rack that can either secure stemware or serve as a second shelf for cups. **2-Position Fold-Away™ Tines** A row of tines in dishwasher racks that can be adjusted to two positions to make room for various-sized dishes. **UltraGlide Rails** The strong and stable upper rack moves with quiet and ease— even when fully loaded— on smooth, easy-gliding rails featuring precision-mounted ball bearings. **WaterLock® Flood Protection Technology** A technology that detects an electronic malfunction in the dishwasher and prevents water from flooding the kitchen or damaging the electrical system by shutting off water to the dishwasher. **WaterLock® Plus Flood Protection Technology** A technology that detects an electronic malfunction in the dishwasher and prevents water from flooding the kitchen or damaging the electrical system by shutting off water to the dishwasher. **WaterLock® Tall Tub** High-grade stainless steel interior is elegant, durable and resists discoloration and energy.

**Compactors**

**Compaction Ratio** Models feature an option having a 6:1 compaction ratio that reduces trash volume up to 80% by keeping the ram at the bottom of the compactor to maintain pressure on the contents.

**Drop-Down Side Door Compactors** Can be accessed by a latch from the side for easy access and cleanup.

**Fan with Charcoal Filter** Part of the advanced odor management system, a fan circulates air throughout the compactor and activates a charcoal filter to reduce unwanted odors.

**Open/Start Pedal** A foot pedal that allows the compactor to be opened or started by applying slight pressure on the easy-action, full-width pedal.

**2-Point Drive System** Feature of compactors that helps avoid jams from uneven loading.

# Warranty

## PLATINUM WARRANTY

All Jenn-Air® appliances carry a minimum limited warranty of one year parts and labor. Warranties begin on the date of purchase. The years after date of original purchase are listed across the top. Warranty terms are subject to change, and below summaries by product category are provided for reference purposes only. Visit jennair.com for the most current warranty details including applicable terms, conditions and exclusions, or consult the Use & Care Guide provided with your product.

## Owner’s Responsibilities

The customer has certain responsibilities which must be satisfied to qualify for coverage under these warranties. For all products, the owner is responsible for providing normal care and maintenance in accordance with the Use & Care instructions, providing proof of purchase on request, proper installation and making the appliance reasonably accessible for service.

## Warranty Service

Under the limited warranty, when labor is provided, service must be performed by an Authorized Jenn-Air Service Contractor. To obtain service, contact the dealer from whom the unit was purchased, an authorized Service Contractor or Jenn-Air Customer Assistance. In the U.S.A. and Canada, call 1-800-JENN-AIR (1-800-536-6247). Please include model number, serial number and date of original purchase in all correspondence. Service will be provided during normal business hours. This warranty gives you specific rights, and you may also have other rights which vary from state to state or province to province.
